For the following questions, please answer the prompts in your own words. Please write 1-2 paragraphs to fully answer the questions.

Why are you interested in being a Learning Assistant? What do you hope to gain from the position?

What experiences do you have engaging in the course material of the course you would like to support (e.g. study strategies, classroom habits, group projects, events, labs)? Please relate this to math, chemistry, and/or physiology. If you have limited course-specific experience, please share about your experiences engaging in your academics (study strategies, classroom habits, group projects, etc.)?

What skills, attributes, and/or qualities do you think are important for Learning Assistants when supporting peers in the classroom?
